

## THE DADO SOFA GETS READY FOR SUMMER AND CHANGES “CLOTHES”

Dado - design Studio Progettisti Associati

**DADO**, is made up of three elements: seat with straight and angular backs and without backs: featuring contemporary lines, conceived with a simple, functional design. Thanks to its modules formula, Dado was conceived from its very beginning in order to offer the widest compositional freedom. Among them the three seating choices allows for the design of linear solutions or even more modern and creative compositions, according to personal demands of taste and or of available space. With Dado every composition acquires its own personality.

**Dado** in polyethylene woven thread is a creation born from the idea to create an aesthetically appealing product for outdoors and indoors alike, to be used to decorate bars, restaurants, hotels, cafés and terraces.

**DADO**, in its “summer” version, is manufactured in woven polyethylene thread.

**Application:** outdoor and indoor premises.

**Target:** gelato shops, bars / cafés, hotels, cocktail lounges ...
